### PROJECTION

Brilliance without the premium price

Experience crowd-captivating clarity, colours and contrast with Jazz Series, an outstanding bright, light and compact, value-packed design.

When it comes to 3DLP projection, you don't have to settle for Rec.709! Sapphire 4K40-RGBH delivers performance no other laser phosphor can match.

### LED

Think LED. Think Christie.

Explore the impressive range of Christie® LED video walls that deliver results for any space, with exceptional visual performance, design flexibility and reliability.

Engineers for accuracy, reliability and brilliance, Christie® VividLife™ powers exceptional LED displays.

### PROCESSING

A revolution in compositing

CHRISTIE  
SPYDER

Discover a better solution for live events and broadcast with the Spyder-S Series. It refines compositing and processing with a modular twist.

### LG LED

LG's All-in-One LED displays deliver plug-and-play simplicity with built-in control, audio, and webOS management. Designed for meeting rooms and corporate spaces, they offer powerful visuals with fast installation and minimal setup.

Discover LG at ISE 2026, showcasing high-impact LED displays designed for corporate, retail, broadcast, and immersive environments.

Experience how their advanced LED technology delivers exceptional brightness, clarity, and the design flexibility to transform spaces with powerful visual impact.

Interact with AI-powered displays and explore textured, holographic, and transparent LED innovations while discovering the latest Unilumin products.

From control rooms to meeting spaces, retail, and rental environments, see how these solutions transform spaces into vivid, lifelike experiences.

### UNILUMIN LED

Unilumin's UTV-SC series features advanced COB flip-chip technology that cuts energy use by up to 60%.

Its all-in-one, high-performance design makes it a cost-effective must see solution for corporate, retail, and education spaces.
